

Product Information Sheet

for KILLGLASS KOOLROOF®

KOOLROOF®

An Introduction To KillGlass KoolRoof®

**KillGlass KoolRoof® -
The ultimate solar reflective
paint matrix for all roof types.**

Advanced technology

KillGlass KoolRoof® is a revolutionary paint system which significantly reduces heat from the sun. Utilising nano-sized glass platelets and spheres KoolRoof® is able to reduce surface temperature and therefore keep surfaces cooler even in extreme climates. By increasing the reflective properties of the surface KoolRoof® gives cooling of 10 watts per m², more powerful than many commercial air-conditioning systems.

Easy Application

KoolRoof® can be applied to almost all roof construction materials as it has powerful adhesion, highly flexible and soiling and algae resistant.

No solvents are used in the formulation giving excellent fire retardant properties and ease of application.

Due to the tough composition of the product, KoolRoof® will keep working in aggressive operating conditions.

Suitable for

- ✓ **Buildings - Factories, Shopping Centres, Houses, Apartment Blocks and Business Centres**
- ✓ **Vehicles - Buses, Construction Machinery, Trains, Trucks and Camper Vans**
- ✓ **Marine - Commercial Shipping and Leisure Craft**
- ✓ **Industrial - Storage Tanks, Ground Monitoring Systems**
